

## **NEW FRONTIER**

Space, they say, is the new frontier  
and are making plans to go out there  
They now have the technology they need  
to reach their goal with amazing speed

Whatever scheme enters the heart of man  
he is found doing it as fast as he can  
Well, we landed a man upon the moon  
and will be going on to Mars very soon

As they make advances for mankind  
the things of Yah are left behind  
It is sad to know that in it all  
man does not heed the Spirit's call

They're always looking out into space  
but they don't seek the Creator's face  
Why seek things that are passing away  
and not the things that eternally stay

The new frontier should be in the heart  
and receiving Yah is the place to start  
A new life will come shining through  
as He births the Son of Yah in you
