

SPACE TRAVEL

In the future of the human race
the next frontier is outer space
The other planets we continue to probe
and watch the stars from around the globe

We are looking in the right direction
but what we see needs some correction
Yah will grant us to leave the earth
but not until we know man's worth

This will take a change of heart
and to love each other is a start
First the man of sin must die
before we venture beyond the sky

Unless the soul of man is purged
from his evil and corrupted surge
He'll not be permitted to spoil the scene
of a universe which is pristine and clean

Turn to Yah with humble hearts
accept the cleansing His blood imparts
What man can not do on his own
Yah is doing from heaven's throne

When this earth is purged from sin
then we can go where we haven't been
Until in Him on that day we stand
we shall remain an earthbound man
